To: Mr. Chitrak Shah Founder & MD, Shivalik Group Ahmedabad, Gujarat

RE: Strategic Cyber Resilience for Shivalik's Future-Ready Vision

Dear Mr. Shah,

Chitrak Shah's vision of a "future-ready" organization requires a foundation that can withstand the storms of the digital world. The IFSCA mandate is the regulatory expression of this reality. For Shivalik Group, this is not just a compliance challenge; it is an opportunity to demonstrate the institutional maturity that global tenants in GIFT City demand.

Sevlex Cybersecurity stands ready to be the partner in this next phase of growth. We offer the system that protects the system-builders. We bring the "eyes that never sleep" so that the builders of Shivalik can dream bigger.

OUR CORE CAPABILITIES FOR SHIVALIK GROUP

We bridge the gap between standard IT support and advanced security operations, ensuring your infrastructure is secure, compliant, and resilient.

- **Managed Detection & Response (MDR):** 24/7 security monitoring that detects and neutralizes threats in real-time. This is the "eyes that never sleep" capability essential for critical infrastructure.
- **Penetration Testing (VAPT):** We simulate real-world attacks on your internal networks and smart building systems to identify vulnerabilities before investors or malicious actors do.
- **Compliance & vCISO:** Fractional security leadership to navigate the complex IFSCA cybersecurity guidelines, ensuring your GIFT City projects meet the highest regulatory standards without the overhead of a full-time executive.

THE PROPOSAL: FROM COMPLIANCE TO COMPETITIVE ADVANTAGE

By partnering with Sevlex, Shivalik Group does more than comply with a regulation; you inoculate your growth engine against the greatest risk of the 21st century.

We invite the leadership team to take the first step: a comprehensive **Cyber Resilience Discovery Workshop**. In this session, we will map your current digital footprint against the IFSCA requirements and chart a path to turning security into a competitive advantage for your upcoming projects.

Regards,

Meet Panchal
